

لحساب ال BMI

```
import java .util.Scanner;
public class bmi {;
    public static void main(String[] args) {
        System.out.println("Hello Welcome To The BMI Calculator\n");
        System.out.print("please enter your height : ");
        Scanner i = new Scanner(System.in);
        Float h = i.nextFloat() ;
        System.out.print("\n");
        System.out.print("please enter your weight : ");
        int w = i.nextInt() ;
        System.out.print("\n");
        float BMI =(w/(h*h));
        if (BMI <18.5){
            System.out.print("your BMI Is"+BMI+" , And Based on the calculated BMI you Have
(Underweight) ");
        }
        else if ( BMI<24.9){
            System.out.print("your BMI Is"+BMI+" , And Based on the calculated BMI you Have
(Normal Weight) ");
        }
        else if (BMI <29.9){
            System.out.print("your BMI Is"+BMI+" , And Based on the calculated BMI you Have
(Overweight) ");
        }
        else{
            System.out.print("your BMI Is"+BMI+" , And Based on the calculated BMI you Have (Obese)
");
        }
    }
}
```
